NuCedar®
Designed for the home

RoughSawn™ Texture

NuCedar clapboard and trim is now available in RoughSawn™ texture, which replicates the rustic charm of rough-sawn cedar.

Product Features

- RoughSawn™ texture
- Semi-transparent stained appearance
- Exceptionally Low Maintenance
- Available in 4", 6" and 8" exposure clapboard
- All NuCedar trim profiles available
- Factory finished with stained appearance in 17 Popular Colors, 5 Historical Colors and 1400+ custom color options
- Solar reflective properties in NuCedar's coating minimize fading, expansion and contraction, permitting dark paint colors to be used in warm climates
- Lifetime Limited Warranty on substrate and finish
- Available in 16' lengths
- Installs easily, no caulking

12"	11.25"	5/4"	20'	All	

The Look That Lasts.

NuCedar Mills' siding and trim accurately replicate the past's aesthetics, while delivering the future's durability. Milled from cellular PVC, the same material that has become highly popular in exterior trim, NuCedar Classic Clapboard®, Classic Beaded Weatherboard®, and trim are the premier cladding products for the luxury home.

A World of Colors.

Having your home the color you want is easier than ever. NuCedar siding and trim products are pre-finished with Polane® polyurethane from Sherwin-Williams™. This coating fuses to the cellular PVC substrate and offers solar-reflective qualities, which may reduce cooling costs in summer months. This process provides the most durable finish on the market, ensuring your siding will look great for years to come.

The Better Warranty.

NuCedar's Lifetime Limited Warranty is one of the best in the business. The Material Warranty protects against rotting, delamination and damage caused by hail or insects, while the Finish Warranty covers against chipping, peeling or cracking. For the ultimate peace of mind, both the Material and the Finish Warranties last for as long as you own your home and include labor replacement for the first full year of ownership.*
